The Egg Theory Lesson plan

Student name	Dylan Schlepers
Student number	*5882966*
NHL- e-mail address	Dylan.schlepers@student.nhlstenden.com
Specialisation	History
Classcode	ITSB23V1MPES1-A
Supervisor(s)	La, Brian
Examiner(s)	La, Brian
Assessment date	4/10/2026

By handing in this product, I declare that the product is my own work and that it is free of plagiarism.

Student-teacher Dylan Schlepers	**Mentor-teacher (if applicable)** La, Brian	**Date** 3/10/2026
School (+ curriculum) International School IB MYP - Individual and Societies/ History	**Class level (grade, age)** 7 Grade (12-year-old)	**No. Students** 20
Length of the lesson 10 minutes	**Topic/content** The Egg Theory	**Materials (books, etc.)** PowerPoint presentation

Learning Aims	Prior Knowledge, Attitudes, & Skills	How to check students' progress towards the learning aims in this lesson?
• **Knowledge:** Students will learn the basic idea behind Andy Weir's short story The Egg (2009). • **Understanding**: Students will think about how personal identity might change if all human beings were actually the same person in different lives. **Skills**: Students will practise listening and sharing their ideas in a short discussion with a partner.	• Some interest in philosophical ideas or short stories. • Ability to take part in short pair discussions.	• Listen to what students say during the pair discussion. • Ask a few questions during the whole-class discussion to check their understanding.

TIME
Phase 1 **00–02 min:** Hook and introduction
Phase 2 **02–04 min:** Explanation
Phase 3 **04–06 min:** Pair discussion and reflection

Part 2 : Lesson plan[3]

TIME	CONTENT (What are you teaching?)	ACTIVITIES (How are teacher & students working?)	MOTIVATION (Why this activity/approach? Source-backed)
00:00–02:00	**Hook & Framing:** Introducing the main philosophical question.	**Teacher:** Displays Slides 1 and 2 with the prompt: "If you knew that every person you ever interacted with was actually yourself in a different life, how would that change your daily actions?" Calls on 1–2 students to share their first thoughts. **Students**: Think about the question silently and give a short response.	**Why this activity:** The question connects the story to students' own lives. It gives them something to think about before the theory is explained.
02:00–04:00	Andy Weir's The Egg (2009) and its main idea..	**Teacher:** Presents Slide 3 (Andy Weir, 2009, wikiHow illustration). Explains the basic premise of the short story: a conversation between a deceased person and God, in which the person learns that all people are reincarnations of the same soul. **Students:** Listen to teacher explanation.	**Why this activity**: A short explanation makes sure everyone understands the basic idea of the story before discussing it.
04:00–06:00	**Good and evil, and the Golden Rule.**	**Teacher:**	**Why this activity**: Discussing the questions with a partner gives students a chance to

		Displays Slide 4 with two questions: 1. If this idea were true, what would happen to the concepts of “good” and “evil”? 2. How would this thought experiment change the Golden Rule? **Students:** Discuss the two questions briefly in pairs.	share their ideas and think about the ethical questions raised by the story.

Part 3: Lesson evaluation (teacher notes after the lesson)

• Were the learning aims achieved? Partly. Students understood the basic idea of the story, but the lesson ended much earlier than planned (after around 6 minutes instead of 10).

• What went well? The visual introduction and the subject caught the students’ interest. Their body language also seemed calm.

• What could be improved? The lesson was too short because there were not enough activities for students to take part in. Presenter View was not enabled, so I had to improvise at times. I also need to speak louder.

• What will I change next time? I will add an activity in which students work with the story themselves, for example by putting parts of it in the right order. This should make the lesson more active, help with the timing and give students more to discuss.
